

# Complex lending, *simplified* for community lending organizations.

Meet Voyager AI, purpose-built for commercial, SBA, USDA, and business lending. It brings intelligence across the entire loan lifecycle, so every deal moves faster, with sharper results, and your team still makes every call.

**AI Speed. Human Intelligence.**

## WHY COMMUNITY LENDING MATTERS

# Grow the lending capacity *your community* depends on.

Community lending organizations carry the same complexity as any large institution (SBA guidelines, USDA feasibility, agricultural underwriting) without systems built to move at that complexity's pace.

Voyager AI is purpose-built for that complexity: SBA, USDA, agricultural, and commercial lending intelligence that helps community institutions **grow their portfolio and make more community impact.**

# What community lending organizations are *built* to advance.

Voyager AI is designed to deliver on the outcomes community lending organizations need to grow their lending capacity.

**01****CAPACITY****More lending capability**

Community lending organizations take on more commercial, SBA, USDA, and agricultural loans.

**02****RURAL & AG CAPABILITY****Built for the whole portfolio**

Rural and agricultural lending gets the same depth of intelligence as any commercial deal, built into the platform from day one.

**03****EXAMINER READY****Built for scrutiny**

Every file is checked against the institution's own policy at intake, traceable for examiners.

*“B&I feasibility: 5 weeks reduced to under 2 weeks in an active pilot.”*

Published at [learn.voyagercx.ai](https://learn.voyagercx.ai)

**DIRECT MISSION ALIGNMENT**

These are the same outcomes examiners and boards look for: more lending capacity, delivered compliantly, for the communities these organizations serve.

“

*Free the human to do the  
work that* **only humans  
can do.**

# AI Speed. *Human Intelligence.* Complex lending, elevated.

For community lending organizations, Voyager AI is **the intelligence layer above the systems you already run**, with full SBA, USDA, and agricultural lending logic built in from day one.

**01****SPEED****More deals,  
handled**

SBA packages in ~5 minutes, USDA underwriting in under 10, credit memos in under 5. In competitive commercial lending, the fastest complete package usually wins the deal. That speed turns into more relationships, more capacity, and more growth.

**02****COMPLIANT****Audit-ready by  
design**

Every output shows its inputs, logic, and override path. Every credit decision is approved by a human. Auditability is the product.

**03****YOUR VOICE****Your Organization,  
Your Voice**

Your policy, your judgment, your relationships: that's what makes you unique. Voyager AI scales that voice across every deal, privately and securely, so it's amplified, never replaced.

**PROVEN IN PILOT**

B&I feasibility studies that used to take five weeks now take under two, published at [learn.voyagercx.ai](https://learn.voyagercx.ai).

**130%**

month-over-  
month platform  
growth

# 130% growth. One *scaling* network.

Through CAFE, Voyager AI is bringing complex commercial, SBA, USDA, and agricultural lending intelligence to community lending organizations.

*From pilot to scale: 12 pilot agreements targeted by April 2027, with conference access to national banking events opened through the CAFE accelerator.*
